Chatham, ON | +1 226-988-6106 | tauany.santoss@gmail.com | LinkedIn | GitHub | Portfolio

SUMMARY

Tech Lead with experience across software development, QA, and technical support in enterprise SaaS environments. Experienced in investigating complex production issues using logs, SQL queries, APIs, browser tools, and debugging workflows to identify root causes and improve user experience. Hands-on experience with JavaScript, React, Java, SQL, HTML, CSS, Git, and modern web development workflows. Strong background collaborating with engineering and product teams, improving investigation processes, mentoring peers, and supporting team upskilling initiatives. Passionate about connecting the technical side of products with user experience, understanding not only what is broken, but why it matters and how to improve it in meaningful ways. Currently expanding knowledge in AI through Generative AI Foundations training.

TECHNICAL SKILLS

Languages & Web: JavaScript, Java, HTML5, CSS3, SQL

Frameworks & Libraries: React, Vue.js, Node.js, Express.js, Tailwind CSS

Tools & Platforms: Git, GitHub, Jenkins, Kibana, Postman, NPM, Vite

Testing & Debugging: Playwright, REST APIs, Root Cause Analysis, Log Analysis, Browser DevTools, Troubleshooting

Methodologies: Agile / Scrum, Cross-functional Collaboration, Technical Mentorship

EXPERIENCE

Tech Lead, Administrator Support

Jun. 2025 – Present

D2L

Remote

- Lead investigations into complex production issues involving logs, APIs, SQL queries, and system behavior analysis.
- Mentor and support peer upskilling through collaborative troubleshooting, technical guidance, and knowledge-sharing initiatives.
- Improve troubleshooting workflows and investigation processes to reduce resolution friction and enhance team efficiency.
- Lead automation and operational efficiency initiatives to streamline internal workflows.
- Facilitate technical training sessions and collaborative investigation meetings focused on troubleshooting and operational improvements across the team.

Senior Technical Support Analyst / Technical Support Analyst

May 2023 – May 2025

D2L

Remote

- Investigated complex production issues through log analysis, SQL queries, API validation, and issue reproduction across multiple environments.
- Collaborated with engineering and product teams to identify patterns, validate fixes, and improve long-term product stability.
- Supported real-time troubleshooting efforts for high-impact technical issues in enterprise SaaS environments.
- Delivered consistent technical solutions while maintaining high customer satisfaction and service quality.

Product Support Specialist / Product Support Analyst

Jul. 2020 – May 2023

D2L

Remote

- Resolved technical issues through debugging, code analysis, and database investigation.
- Used tools such as Kibana, SQL Server, and browser developer tools to identify root causes and recommend solutions.
- Collaborated across teams to support escalations and improve issue resolution workflows.
- Maintained 100% adherence to quality and efficiency KPIs for over one year.

Full Stack Developer

Oct. 2018 – Nov. 2019

Digicade Tecnologia

Belo Horizonte, Brazil

- Developed geographic information systems for fiber optic network management using Java and JavaScript.
- Worked with SQL, HTML, CSS, and Git in Agile/Scrum development environments.

- Contributed to front-end and back-end development initiatives focused on system performance and user experience improvements.

Intern and Developer Analyst

Axiom

May 2014 – Oct. 2018

Belo Horizonte, Brazil

- Contributed to the development and testing of a SCADA system for a major energy company.
- Created technical documentation and supported system validation efforts to ensure reliability.
- Collaborated with stakeholders to gather requirements and support feature implementation.

PROJECTS

EcoWatch | *React, Express.js, Tailwind CSS*

- Built a full-stack environmental monitoring application integrating real-world API data and responsive UI components for dynamic data visualization.

Memory Game | *React, JavaScript, Tailwind CSS*

- Developed an interactive browser-based game featuring dynamic state management, timer functionality, animations, and responsive layouts.

To-Do Application | *Node.js, Express.js, MongoDB, EJS*

- Created a task management application using MVC architecture with CRUD operations, validation, and responsive UI enhancements.

EDUCATION

McMaster University

Front-End Development Certificate

2024

Udemy

The Complete 2023 Web Development Bootcamp

2023

Federal University of Minas Gerais

Bachelor's Degree in Information Systems

2017

Brazil

PROFESSIONAL DEVELOPMENT

Generative AI Foundations: Praxis AI (In Progress)
